## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 2, 3, 6, 7, 8, 9-11 drawn to a method or apparatus of converting device dependent image signals into device independent signals.

Group II, claim(s) 4, 5, drawn to a method of determining primary colors of a color image.

2. The inventions listed as Groups I, II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: group I claims a method or apparatus of converting device dependent image signals into device independent signals comprising steps of and means for converting device dependent image signals into device independent image signals representing densities with block dyes, while group II claims a method of determining primary colors of a color image comprising the steps of setting a color reproduction range, setting three straight lines; determining the vertexes of a triangle, determining chromaticity values. Thus, inventions of group I and II are distinct from each other.

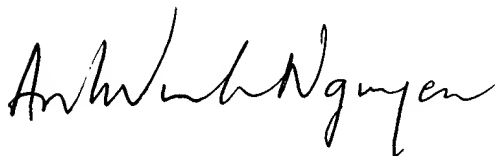

Art Unit: 2626
